Product Introduction

About Self-Service Ordering Kiosk

Self-service ordering kiosk is an intelligent dining service device that allows customers to complete the ordering and payment process on their own without the intervention of waiters. The introduction of this equipment is mainly to improve restaurant operation efficiency and customer satisfaction.

Why Do You Need it?

Streamline processes

Upon entering the store, customers can order through the touchscreen, proceed with payment, and receive an order receipt, simplifying the traditional service process.

Enhance efficiency

Self-ordering reduces wait times and allows servers more time to provide other high-quality services, such as serving dishes and clearing tables.

Points redemption

Stores can implement their own point systems, and through self-ordering machines, provide points redemption services for every customer, encouraging customer retention.

Simple operation

The self-ordering machine is very easy to use, similar to ordering with a mobile phone, making it suitable for all types of people.

Promotional activities

During idle times, the screen can display more store promotions, allowing customers to be informed promptly, thus increasing marketing conversion rates.

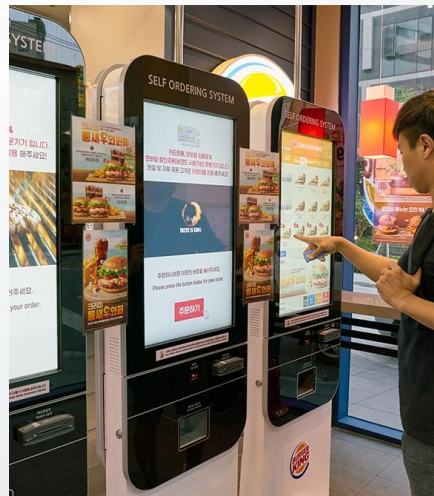

Application Scenarios

Fast food restaurants

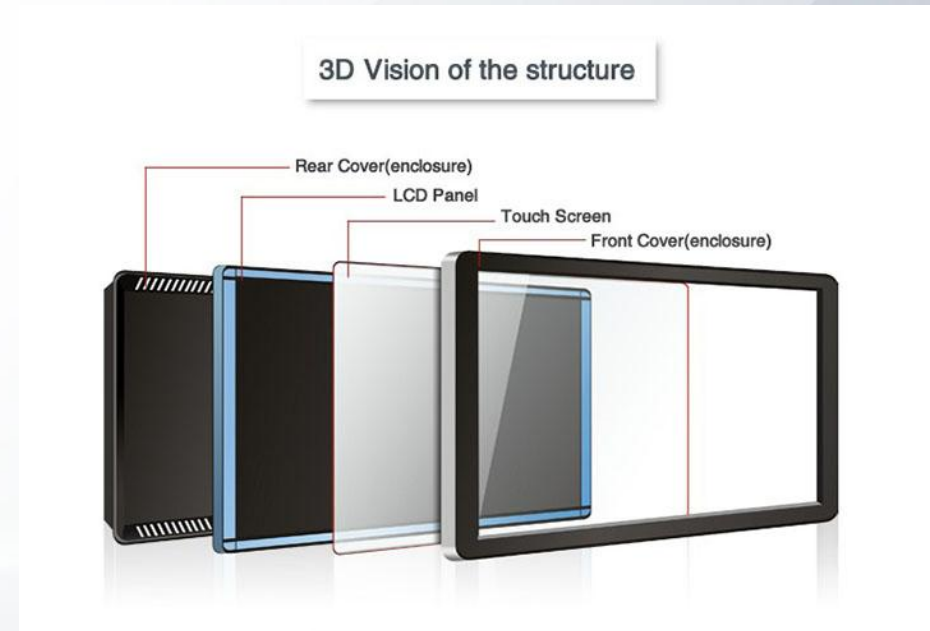

Bubble tea shops

Shopping malls/supermarkets

Restaurants with high foot traffic

Capacitive touchscreen

- ✓ Self-service kiosks generally use capacitive touchscreens, which provide a similar touch experience to smartphones, with precise and sensitive touch control, offering great comfort. Additionally, their fully enclosed design prevents water droplets, dust, and other particles from entering, making the screen easy to clean.

How choose a Self-Service Ordering Kiosk?

| Common Screen Size

The screen size of self-service ordering machines is usually 21.5 inches, 24 inches or 27 inches, which are the most widely used sizes and are more in line with the viewing angle and operating experience of the human eye. 32 inches is also quite common. Of course, you can also customize the exclusive size of the device according to your own usage scenarios.
